Manufacturing tomorrow’s intelligent hydraulic systems by collaborating and empowering industries today.
People are our most precious resource - A multi-skilled and motivated staff is our strongest asset. Our success relies on an excellent working environment and satisfied personnel. Nearly 200 industry professionals around the world ensure the uncompromising durability of our products and unparalleled service quality.

Each and every Hydroline employee determines who we are and what we are capable of doing. Hydroline’s pioneers, both experienced veterans and new recruits, form a crew with its sights set far out on the horizon. We believe that this does not only define Hydroline today, but the future of the hydraulics industry itself.
SOLUTIONS

Our cylinders function as part of complex smart systems and applications. Only the best materials go into each and every one of our products. We take special conditions and cleanliness into consideration throughout the planning and manufacturing process.

Our modern machine-base and automation ensure that we can provide customer-specific solutions for various applications. Each cylinder model is custom-made to meet customer’s needs and specifications. This is only possible due to our close cooperation with our customers.

LIFE CYCLE

We are able to provide service solutions throughout the life cycle of mobile machinery, tailored to your exact requirements.

Whether you need consultation for design and R&D or education and maintenance services, we are here to help you. Our aim is to keep your business running as efficiently, productively and profitably as possible.
MANUFACTURING

Our automated, fast and flexible production is truly world-class. The 3D design and strength calculations we use in the products we manufacture are done using state-of-the-art design programs.

We oversee the production process from design to delivery by means of real-time production control. During assembly phase, all products are visually inspected, effectively flushed clean and pressure tested with hydraulic oil.

Variations available on our cylinders:
- Various seals
- Integrated valves and linear sensors
- Hardened or stainless steel rods
- Special surface treatments
- Fully stainless steel cylinders
- Integrated piston accumulators
- Integrated electronics

SUCCESS

Our long running customer relationships, some over four decades long, give testimony of the trust our customers have placed in our technology, quality standards and expertise. All our customers are leading international operators and manufacturers in the automotive, mining, forestry, agriculture, load handling and other industries involving smart hydraulic systems.

INNOVATION

FULL R&D CO-OPERATION

Providing up-to-date R&D services for hydraulics

SUCCESS

Our long running customer relationships, some over four decades long, give testimony of the trust our customers have placed in our technology, quality standards and expertise. All our customers are leading international operators and manufacturers in the automotive, mining, forestry, agriculture, load handling and other industries involving smart hydraulic systems.
“Working with Hydroline has allowed me to maintain and improve the quality of the services I offer as a load handler. I trust Hydroline because the products and services they provide to my equipment’s manufacturer are top-quality and always delivered on time. As a customer, I feel part of the Hydroline family, when I have a question or a suggestion– they listen. The fact that they are now a global company assures me that when it comes to hydraulic technology, I will not be left behind.”

- Ari Hakokivi, Load Handling Services, Kuopio Finland
TRUSTED GLOBAL PARTNER

We have global presence always available to our customers, regardless of their geographical location. Our solutions for a better global service are international cooperation and operational expansion.

Our vision - to become the trusted resource and preferred partner in intelligent hydraulics solutions worldwide.

Our mission - to be a dynamic problem-solver able to generate true added value for all of our partners’ products and services.
